

Presentation / E-Learning Tool vs 1.1

Create an interactive time based presentation / training module and distribute the result on screens, tablets and the web.

- Structure the Who/What and When
- Organise Where
- Distribute the Why

Gather all of your presentation material and place into the correct folders then use the administration tools in Creation mode [D] to create all of the interactive elements and timed experiences such as slideshows with transitions, galleries, videos and people. Then:

1 Use the Create mode to set up the base of either a video or a slideshow

2 Create all of the stopping or cue points in the presentation using the interface

Create Mode (Stopping points) NEW CP

7.5	Nav Item Stop	✕	🗑️
12.5	Gallery	✕	🗑️
14.6	Pres Team	✕	🗑️
16.6	Simple Stop	✕	🗑️
21.5s	Video	✕	🗑️

Team Area NEW Item

Thumbnail	🗑️	⬆️	⬆️	🗑️
Bio	🗑️	⬆️	⬆️	🗑️
	🗑️	⬆️	⬆️	🗑️

Edit Bio Text

3 Change some of the standard cue points to specials by changing their TYPE and then enter the specific interaction details for that special

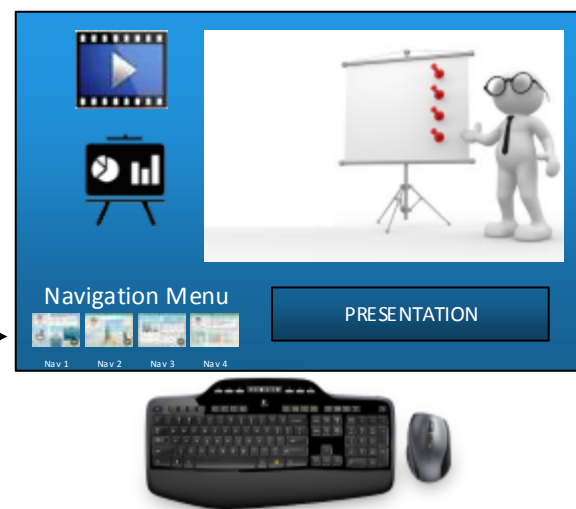

Gallery Edit NEW Item

	🗑️	⬆️	⬆️	🗑️
	🗑️	⬆️	⬆️	🗑️

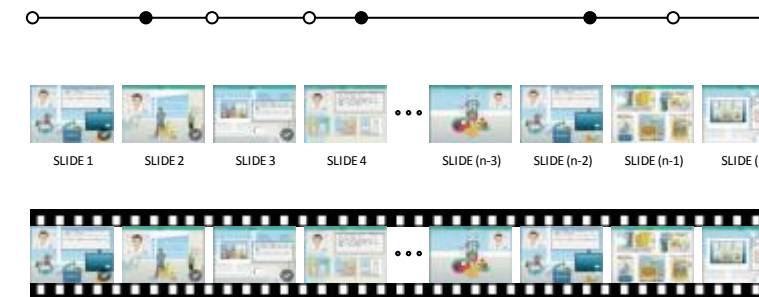

4 Make final changes to the control file, bundle the correct files together and either upload to the web, install on a local fileserver or install as a standalone USB deliverable

Example Presentation

Keyboard, mouse and touch controls
[Pause, Play, Stop, Restart, Jump to chapter, Open nav menu, debug mode, creative mode]

Presentation timeline

Presentation background is either a video or a slideshow. Keyboard commands will either move the background to start/end or in between slides and cue points

- Cue Point – These are time based stopping points in the presentation which will react in differing ways; placing interactive objects such as animations / galleries / teams / video
- Special Cue Point – These are the same as standard cue points but will also auto-pause the presentation and will auto-generate a thumbnail which will populate the navigation menu

Video Player

Person + Bio

Gallery Option

Team Gallery
